3M™ Littmann® Cardiology III Stethoscope

Outstanding acoustic performance and exceptional versatility characterize the Littmann Cardiology III stethoscope. The innovative design offers a tunable diaphragm on each side of the chestpiece. The large side can be used for adult patients, while the small side is especially useful for pediatric or thin patients, around bandages, and carotid assessment.

Features

- Two tunable diaphragms conveniently alternate between low- and high-frequency sounds without turning over the chestpiece
- Solid stainless steel chestpiece
- Two-in-one tube design eliminates tube rubbing noise
- Excellent acoustic seal and comfortable fit with patented 3M™ Littmann® Snap Tight Soft-Sealing eartips
- Comfortably angled, anatomically correct headset
- Patient-friendly, nonchill rim and diaphragm
- Available in a selection of classic tube colors
- Five-year warranty

The pediatric side of the chestpiece easily converts to a traditional bell by simply replacing the diaphragm with the nonchill bell sleeve included with each stethoscope.

Ordering Information

Catalog #	Length	Tube Color
3127	22 in. (55,8cm)	Black
