Two headsets allow both instructor and student to perform auscultation on patients simultaneously.
Two headsets allow both instructor and student to perform auscultation on patients simultaneously. These high-quality stethoscopes are available in two chestpiece designs: the traditional, combination-style chestpiece of the 3M™ Littmann® Classic II S.E. Stethoscope or the single-sided chestpiece of the 3M™ Littmann® Master Classic II Stethoscope. Both feature a patented tunable diaphragm.

Features
- Patented tunable diaphragm conveniently alternates between low- and high-frequency sounds without the need to turn over the chestpiece
- Two comfortably angled, anatomically correct headsets
- Durable, single-lumen tubing
- Patient-friendly, nonchill rim and diaphragm
- Excellent acoustic seal and comfortable fit with patented 3M™ Littmann® Snap-tight Soft-sealing Eartips
- Three-year warranty

Proper Headset Alignment
Littmann stethoscopes have headsets which have been designed to be worn at an anatomically correct angle, oriented toward the user’s ear canals. Improperly wearing the stethoscope headset can result in poor acoustical seal, and in some cases, complete sound blockage.

Wearing a Littmann Stethoscope

Correct Incorrect

How to Care for Your Littmann Stethoscope
- Do not immerse your Littmann teaching stethoscope in any liquid or subject it to steam sterilization. If sterilization is required, the stethoscope should be gas sterilized using the cold cycle in a 3M™ Steri-Vac™ Gas Sterilizer followed by aeration for 36 hours in a 3M™ Steri-Vac™ Aeration Cabinet.
- Keep your stethoscope away from extreme heat, cold, solvents and oils.
- The entire stethoscope can be wiped clean with alcohol or mild soapy water.
- Eartips may be removed from the eartubes for thorough cleaning.
- Using alcohol on the chestpiece between patients is recommended.
